BUSINESS MODEL AS A PLATFORM FOR THE IMPLEMENTATION OF THE PROCESS APPROACH IN THE MACHINE-BUILDING INDUSTRY

Z A Avlasko, I S Bagdasarian and P V Avlasko
Research «World Robotics 2017»

Number of installed industrial robots per 10,000 employees in the manufacturing industry 2016

- Republic of Korea: 631 units
- Singapore: 488 units
- Germany: 309 units
- Japan: 303 units
- Sweden: 223 units
- Denmark: 211 units
- United States: 189 units
- Italy: 185 units
- Belgium: 184 units
- Taiwan: 177 units
- Spain: 160 units
- Netherlands: 153 units
- Canada: 145 units
- Austria: 144 units
- Finland: 138 units
- Slovenia: 137 units
- Slovakia: 135 units
- France: 132 units
- Switzerland: 128 units
- Czech Rep.: 101 units
- Australia: 83 units

Average world: 74

CBInsights 2019 Research «Advanced Manufacturing Trends In 2019» (USA, New York). Date views 20.03.2018
Since business modeling is only a way of displaying current and projected enterprise processes to improve business performance, the platform for successful implementation of the process approach should be called the development of a business model that should include a comprehensive analysis of the enterprise’s activities. Thus, the general scheme of work on the implementation of the process approach as a project will consist of several stages.
